

# ETERESM BA2001T4

Anode Binder for Graphite Lithium Battery

## Product Description::

Eternal ETERESM BA2001T4 is a light yellow transparent polyacrylic acid water-based resin, which can be used in graphite anode and low silicon anode systems, and provides good adhesion and flexibility for electrode sheets.

## Features::

- BA2001T4 can be applied to dry, wet... and other mixing processes, with a wide tolerance range for equipment speed and slurry temperature.
- This product can be used in combination with CMC and SBR, and has high compatibility.
- This product provides excellent coating adhesion and coating flexibility in conventional formulation applications.
- This product can reduce the sticking of the roller after the electrode sheet is rolled.
- This product can reduce the risk of fine powder generated by electrode slitting and punching.

## Specifications:

adhesives	BA2001T4
appearance	Light yellow transparent solution
Solids content(%)	5.5 ± 0.5
viscosity (cps)	10000 ± 4000
pH	7 ± 0.5
Photo	

## Storage conditions:

Store in a cool, dry and ventilated warehouse in the original packaging at a normal temperature of 5°C to 40°C °
